

ENGINEERED EASY.

877-833-3237

ABSOLUTESTEEL.NET

The Slip Joint Connections

make assembly a snap. Standard frame packages can be assembled in hours, not days!

The "Stand Alone" Frame System

is unlike other steel frame systems. Our structures can easily accommodate other exteriors like wood, stucco, or brick. Make your steel structure aesthetically pleasing and HOA compliant.

All Kits are Engineered

to be assembled by two or more people with little or no experience, using common tools. They are engineered to withstand the toughest of elements, and meet local building codes.

Industry-Leading Warranties

20-year frame warranty, & warranties up to 30 years on panels - against fading & chalking.

Your Source Manufacturer.

- Uses heavy-duty rectangular galvanized steel tubing for years of maintenance-free, rust-resistant service.
- Can be finished in a variety of attractive colors and trims to suit your taste.
- Termite and fire resistant.
- Less expensive than other forms of construction. The cost is about 40% less expensive than a wood structure.
- Can be installed on the ground, on gravel, on a concrete pad, or on caissons.
- Engineered to meet wind and snow loads for most areas.
